

G. C. COOK DISCUSSES PRACTICAL RESULTS OF CHURCH OF CHRIST'S TEACHING ON HUMANITY.

Discusses Practical Results of Church of Christ's Teaching on Humanity.

George Shaw Cook, C. S. B., a member of the board of trustees of the First Church of Christ, Scientist, of Boston, Mass., gave the lecture on the subject of "The Practical Results of the Church of Christ's Teaching on Humanity" at the session of the local Christian Science churches, and was listened to with the closest attention by an audience which completely filled the body of the theater and all the available space on the stage.

After a brief introduction by William S. Campbell, first reader of the First Church, this city, Mr. Cook began his lecture by saying:

"Without adaptation to the needs of mankind, the Christian Science Church as an institution would have no good reason for existence. In order to justify its presence among men, the Church of Christ, Scientist, must be ready to answer, not theoretically but practically, the question, 'What is Christian Science able to do for suffering humanity?'"

"Better to appreciate the answer which Christian Science makes to the foregoing question. It is well for us to have some understanding of what the teaching of Christian Science stands for and to know that first and last it stands for the complete and perfect brotherhood of man. It stands for the spiritual law of God, that He is Spirit, Mind, divine Principle, Life, Truth, Love. It also stands for a perfect spiritual universe as the creation of God, and for a perfect spiritual man as the likeness of God. It stands for the universal fatherhood and motherhood of God, and for the complete and perfect brotherhood of man. It stands for Christ as the spiritual law of God and for Christ Jesus as the perfect exemplification of divine sonship. It stands for Jesus of Nazareth as the model Christian, the master metaphysician, and the highest demonstration of man's unity with God."

Continuing, he said: "Christian Science stands for the law of God and the government of God, and for the absolute supremacy of God's law and government. It stands for the preservation and protection and direction of man and the universe in accordance with the law of God. It stands for freedom from fear, for salvation from sin, and consequently for mankind's deliverance from disease and death. It stands for mental integrity and moral purity; for fidelity and faithfulness; for right relationship, unity of purpose, brotherly love, true charity, and real compassion. It stands for the conscious harmony which is heaven within, and for all that makes for the establishment of the kingdom of heaven, or harmony, among men."

Christian Science Demonstrable. "Having told something of that for which Christian Science stands, and having indicated to some extent that which it claims to do for those who are in trouble, may it not be permitted to say something about what Christian Science is doing to fulfill its promise and something of the way in which it is being done?"

"Through the ministry of Christian Science many thousands have been healed of disease and redeemed from sin, and some have been turned back from the very gates of death. Among these thousands there are those who have been raised from beds of unexpressed pain, the very gates of death, who have been freed from the bondage of poverty and incompetency, who have been able to do things which were impossible for them when they were sick, and who have recovered from their sickness without other forms of treatment or without any treatment. It is probable that some of them would have been reformed by other means, and that some would have become prosperous in another way, but it is a fact that the great majority were utterly hopeless and apparently helpless in their misery until Christian Science showed them a way out of it."

"How were these people healed of diseases which in many instances baffled the most skillful physicians? They were healed by Christ, Truth, which takes away the sins and heals the sickness of the soul, and which is healed by reason of the knowledge that sickness is unnatural to God's man, and that, therefore, man need not endure it. They have found that the fear of evil is unnecessary, for the reason that every phase of evil is temporal and destructible."

Demonstrated by Results.

"Christian Scientists believe that they have demonstrated by results already attained, that Mrs. Eddy has surely discovered and correctly set forth the Principle and law by which Jesus healed all manner of disease among the people of his time. Jesus said of his work, 'I can of mine own self do nothing.' The Father that dwelleth in me, he doeth the works. The Father referred to by Jesus as being the Principle of his works was, according to Christian Science, the divine Mind. Jesus further said to his followers, 'He that believeth in me, the works that I do shall he do also.' Christian Science believes that as followers of Christ Jesus they have a right to do these works. They believe that divine intelligence is as available to man now as it was in the time of Jesus, and that it, and not itself always through invariable law. They are, however, sensible of the fact that they have only begun to understand and apply the Christ method of healing, and they do not pretend that they are always successful in its application. Yet they do know that Christian Science has already proved itself to be efficacious in the healing of many thousands of cases of disease, acute and chronic, functional and organic."

Attains General Recognition.

"Today, when there are in different parts of the world more than 1,600 Christian Science organizations founded upon the rock of Christ-healing, Mrs. Eddy is generally acknowledged as the Discoverer of Christian Science and the revered leader of the Christian Science movement. And Christian Science is gradually coming to be recognized as the re-establishment or restoration of the Christian religion. As this understanding becomes more general, and consequently the resistance to Christian Science diminishes, the conditions of human existence will continue to be ameliorated until they finally disappear. Each day, then, in Christian Science practice makes humanity's burden lighter, and even now, through its beneficent ministrations those who still feel obliged to doubt are being brought nearer to the light."

"Mrs. Eddy has said of her discovery and of its reception, 'I have never supposed the world would immediately witness the full fruition of Christian Science, or that sin, disease, and death would not be believed for an indefinite time; but this I do aver, that as a result of teaching Christian Science, ethics and temperance have received an impulse, health has been restored, and longevity increased. If such are the present fruits, what will the harvest be, when this science is more generally understood?' (Science and Health, p. 248.)"

Murder Reveals Many Marriages

Two Husbands Meet at Woman's Funeral, While Third Is Sought by Police.

BUTLER, Pa., Oct. 22.—Two men clapping hands across the casket of mysterious Mrs. Maud Abigail Bloom murder victim, revealed links in a chain of her many marriages.

The first man was J. W. Freeman, wealthy Omaha oil man—her first husband; the other, Peter Bloom, at least, her fourth. Lulu Evans, a musical comedy favorite, was a daughter of the dead woman.

Mrs. Bloom was found murdered a few days ago. And police are hunting one of her husbands, Fred Croason, ex-convict, who, it is said, had threatened her life.

Behind the tragedy of her death, the evidence shows, was a remarkable string of marriages. As for Freeman, the police had not satisfactorily established tonight that the woman was ever separated legally from him.

Reports concerning the increase in membership of the District chapter of the American Red Cross, the results of the receipts and expenditures during last year, and the election of officers and the appointment of delegates to the National Red Cross convention to be held here in November, were topics at the annual meeting of the District chapter of the American Red Cross, held last night at the Hotel Hamilton.

The financial report shows that \$6,644.00 was realized from the bag sale in March, which will be added to the endowment fund. More than 4,000 were raised from the sale of Christmas seals last year. The treasurer's report showed that a total of \$16,627 was received last year, and of this, \$15,320.44 has been expended.

One hundred and thirty-four children were given an outing under the direction of the local chapter last year at the Day Camp at Fourteenth and Upperville streets.

The superintendent of the instructing Visiting Nurse Society, made her annual report, in which she stated that "the two tuberculosis nurses of the society are visiting in the homes of 600 families where there is tuberculosis. In these families we may estimate that there are 1,300 children." These children, she said, should be brought to the Day Camps next summer.

Asphalt Beds Yield Up Midget Antelope Bones

LOS ANGELES, Cal., Oct. 22.—The skeleton of a diminutive antelope, said by scientists to have lived in this vicinity many centuries ago, has been placed on exhibition at the Los Angeles county museum. The skeleton was unearthed at La Brea asphalt pits, near here, recently.

The skeleton is nineteen and one-fourth inches tall, just twice the height of the ordinary jackrabbit. Most of the bones were well preserved by the asphalt, and the skull, from which the bones of many varieties of prehistoric animals have been taken.

Frank L. Daggett, director of the museum, who is in charge of the work of recovering skeletons of animals of olden days, said the latest find was that of the "cupreous midget," or more commonly called "the little antelope."

PROGRESSIVE CLOTHING BUYERS TAKE ADVANTAGE OF UNUSUAL OFFER

BUSY SCENES AT 428 9TH ST.

More than that. They're walking right in and are taking advantage of the reductions to get their clothes in fine style and shape for fall and winter. No wonder! Values like these are not found elsewhere. As a regular thing, Friedlander Bros. have the reputation of offering exceptional clothes values, but these last showings are going to be their former offerings one better—and then some.

Suits and Overcoats at \$10. They're not 25 new pieces, but a combination of goods, grades, styles, fit and low purchase money. They're here in shapes and patterns to suit every body. Swagger form or conservative. Satisfaction is yours at \$10 a throw.

You don't have to stop at \$10. Other big values are on hand. Suits and Overcoats that would command \$15 elsewhere on sale here at \$12.50. Still better Suits and Overcoats, sold up to \$22.50, offered at \$15.

The trouser offerings run from \$1.95 to \$2.95. And in between, some fine ones at \$4.95 and \$5.95.

Head straight for Friedlander Bros. Keep the address in mind, 428 Ninth street. You'll cash in if you're willing on big clothes bargains within ten minutes after you strike the store—ADVL.

NO FARM LOAN UNDER SECOND MORTGAGES OF CADETS EXPECTED

Herbert Quick Denies Reports That Have Gained Wide Circulation.

Correcting reports that have been given widespread circulation, Herbert Quick, member of the new Federal farm loan board, today announced that absolutely no loans can be made under the act on second mortgages.

"The farm loan act specifically provides," said Mr. Quick, "against second mortgage loans. Only first mortgages can be accepted, and then only to the amount of 60 per cent of the value of the land and 30 per cent of the permanent insured improvements on the land."

Mr. Quick believes the new law will be a blow to absentee landlords, long held up as one of the principal shackles on the development of the South.

"No absentee landlord may obtain money under the new law," he said. "Only farmers who are actually engaged in tilling the land or who are about to commence farming upon it, may profit through the farm loan law."

While second mortgages are legal security for "farm loans," bankers and business men throughout the country, according to Mr. Quick, are looking forward to raising the long-dead second mortgage from the mire of mistrust into which it has largely fallen.

"With a safer, long-term first mortgage system developed, risks on second mortgages will disappear in a far better light," he said. "The burden of the first mortgage on the second mortgagee's forfeiture will cease to be intolerable."

School Officials Believe Summer Camp Will Bring Many Into High School Regiment.

Enrollment of cadets in the High School regiment will be larger this year than ever before because of the attraction of the summer camp, school officials believe.

The camp will be free to the cadet, \$1,000 having been appropriated by the Government for maintenance of an instruction camp. Food, labor, and all incidental expenses involved, are to be paid for from the fund.

The Secretary of War is authorized to permit conducting of the camp on a Government reservation near Washington. Tents and other equipment are to be provided, and adequate supervision and instruction given by army officers.

The camp will open about the middle of June, and continue until the first of July. It is probable that another uniform for camp wear will be necessary. The winter clothing is too heavy for summer drilling.

Winter uniforms are to be supplied by a Philadelphia firm. The cost of a private or non-commissioned officer's uniform is \$16.50, and the officer's will cost \$18.50.
